

Children's Health / Psychology / Arts & Crafts

A companion book to *Healing Images for Children: Teaching Relaxation and Guided Imagery to Children Facing Cancer and Other Serious Illnesses* by Nancy Klein

— TO DO LIST —
Remember to take
Activity Book along
— to the hospital
— when traveling
— to appointments
— when resting
— to a friend's house
— just for fun

"The *Healing Images for Children Activity Book* gives a sense of peace and well being, along with encouragement and self-help ideas. I thought every one of the thought-provoking activity suggestions was right on. My son immediately began coloring and reading the pages. When he finished with the writing and drawing, the book became a keepsake."

— Barbara Schmidt, parent of three children

"*Healing Images for Children* is a veritable 'toolbox' of strategies for coping and healing. It is a multidimensional program to be used across a range of personal and medical contexts."

— Joel Wish, Ph.D., Director of Health Psychology, Clinical Associate Professor

"The *Activity Book* is motivating for kids and can be used therapeutically to encourage physical as well as emotional expression. The pages incorporate visual motor integration and visual perceptual skills, fine motor strengthening, and sensory experiences into creative and fun activities for children with chronic illnesses."

— Sara Clark, M.S., O.T.R., Occupational Therapist

A playful puppy named Bailey encourages children to express themselves and make this book their own through the exciting activities in this interactive workbook. The activities reinforce the themes of confidence, courage, and comfort.

Recommended for Ages 4 – 12+

Specializing in products and activities that foster positive thinking, reduce stress and build self-esteem in children.
